

Fixed Arch Machines

This unit is a drive through brushless unit for the cleaning of all irregularly shaped vehicles. The machine consists of two spray arches, the first to supply a cleaning solution with metered cleaning agent, and the second to rinse away the loosened soiling water.

Key Benefits:

- Ideal for the mixed fleet operator
- Rugged and highly reliable
- Economical to operate
- Simple to operate and maintain
- High performance pumps
- Automatic operation
- All steelwork hot dip galvanized
- Optional hand pressure washer for spot cleaning
